CAREER OBJECTIVE

I am committed to advancing my skills as a proficient Java developer, continually honing my technical expertise, problem-solving abilities, and collaborative skills. My focus is on consistently delivering high-quality Java solutions, tackling new challenges with confidence, and building a successful career in software development.

JOB EXPERIENCE

Jr. Programmer

IBCS-PRIMAX Software Bangladesh Ltd.

Duration: June 2023 to Present.

Responsibilities:

- Collaborated on a complex Microservices application of the Bangladesh Planning Ministry.
- Assign to develop and support new modules and features of the existing system.
- Utilizing Java, Spring Boot, and Angular with Microservice technology.
- Integrated third-party API like AMS data integration, Nothi User signature integration, etc.
- Responsibilities include crafting a mobile app backend, developing backend services, and enhancing the web frontend with client-specific features.

RELEVANT SKILLS

Back-End Technologies

Proficient in Java, Spring MVC, Spring Boot framework, and Microservices technologies, with good knowledge of JDK, JRE, JVM architecture and Memory management. Skilled in Object-Oriented Programming, including Data types, Variables, Objects, Methods, and Control structures. Expertise extends to Stream Api, Data Structure and Algorithms, Exception handling, Multithreading, and the Collections framework.

Front-End Technologies and Frameworks

Experienced in Angular, TypeScript, and JavaScript, I specialize in crafting dynamic web applications with seamless user experiences. Leveraging Angular's robust features and Angular Materials, I create polished interfaces with efficient routing and data binding. Additionally, I excel in HTML5, CSS3, Bootstrap, and Tailwind for visually appealing and responsive designs.
